Safety Instructions

Read this manual carefully before putting the appliance into operation and keep this manual for future reference.
- Do not place the unit close to your ears.
- The alarm is 120 dB loud. Use with care.
- Keep batteries out of reach of children.
- Swallowing may lead to serious injury in as little as 2 hours or death, due to chemical burns and potential perforation of the oesophagus.
- If you suspect your child has swallowed or inserted a button battery immediately call local emergency.
- Examine devices and make sure the battery compartment is correctly secured, e.g. that the screw or other mechanical fastener is tightened. Do not use if compartment is not secure.
- Dispose of used button batteries immediately and safely. Flat batteries can still be dangerous.
- Tell others about the risk associated with button batteries and how to keep their children safe.

Environmental Friendly Disposal

Old electrical appliances must not be disposed of together with the residual waste, but have to disposed of separately. The disposal at the communal collectingpoint via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances.

- Button: Press once to trigger function. The function depends on the screen selected. Press twice to find your phone.
- Hole: Fasten the Tag to your belongings with a keyring, a piece of string or a metal cable.
- Battery tray: Remove to replace battery.

APP Installation

You need to download the Echo app in order to use the Echo Tag. The app is available for free on the Apple App Store and Google Play Store for iOS 10 and newer, and Android OS 4.3 and newer.

Download on the App Store

GET IT ON Google Play

Scan the QR code to download the Echo app for your device.

Change The Battery

When the Tag's alert volume becomes very soft or if it turns off itself and set off the alert, it is most likely that it is low on battery. Replace with a CR2025 lithium button cell.

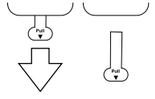
Echo app displays an estimated battery level for each connected Tag. Launch Echo and tap the Tag you wish to check. The top right grid displays the percentage of battery remaining.

1. Pull the battery tray out.
2. Replace the battery. Take note of the positive and negative ends of the battery.
3. Push the battery tray back in until it clicks in place.

Activation

If your Tag comes with a battery insulator, remove it before use.

1. Pull the battery insulator outwards to remove.
2. Press and hold the button to turn on the Tag.
3. The Tag will beep twice and the LED will blink at regular intervals to indicate that the Tag is powered on.



Charging The Battery

Turning the Tag on or off
Turn On: Press and hold the button until the Tag beeps twice.
Turn Off: Press and hold the button until you hear a long beep.

Pairing the Tag
1. Ensure that the Echo app is downloaded and installed on your phone.
2. Ensure that Bluetooth is enabled on your phone. Launch Echo app.
3. The Tag will show up as Echo Tag under Unpaired Tags. Tap to pair.
4. The Tag will automatically be connected upon pairing.

Echo app navigation
The bottom navigation bar consist of four tabs:
List -Tag List displays all tags within Bluetooth range of your phone.
Tag -The Tag dashboard to control and setup your Alarm.
Media -Create and browse your media content.
Settings -Select your preferred settings.

Disconnecting the Tag
The Tag is disconnected once it is out of Bluetooth range of your phone. This includes situations where the Tag is powered off. Disconnected Tags will still appear under the Paired Tags section in the Tag List.

Reconnecting the Tag
The Tag automatically connects to the phone upon pairing. If a Tag goes out of Bluetooth range, it becomes disconnected. When the Tag comes back within range, it will automatically reconnect.
