

Travel Hub PRO

Output

Input

The compact, versatile World Adapter MUV USB from SKROSS® can do everything you want it to, all at once. While the adapter provides the correct connection for your electric razor, the dual USB charger module can top up the battery on both your smartphone and your tablet. All this is made possible by a dual USB charger, which has been directly integrated into a SKROSS® travel adapter for the first time. This means that during the charging process, the connection side of the adapter is left free and can be used without restriction. The dual USB port provides sufficient energy to charge two USB devices easily, even if another device is connected via the adapter at the same time.
